Senior Software Developer

Description

We are seeking a talented and motivated Senior Software Developer to join our dynamic team. The ideal candidate will have hands-on experience in PHP, Python, and Node.js, a strong foundation in web development principles, and a passion for building high-quality software solutions. You will play a key role in developing and maintaining complex applications, mentoring team members, and driving innovation within our development team.

Key Responsibilities:

1.Design, develop, and maintain scalable web applications and backend services using PHP (preferably with a modern

framework), Python, and Node.js.
2.Apply strong knowledge of OOP concepts and MVC architecture in daily development tasks.
3.Collaborate with front-end developers to seamlessly integrate UI components with server-side logic.
4.Lead and participate in code reviews, mentoring junior developers, and ensuring adherence to coding standards and best practices.
5.Stay up-to-date with the latest industry trends, technologies, and best practices in web and software development.
6.Develop and maintain RESTful APIs and integrate third-party services as needed.
7.Utilize Git for version control and collaboration across distributed teams.

Required Skills & Qualifications:

1.2+ years of professional experience in software development with a strong focus on PHP, Python, and Node.js.
2.Experience working with WordPress, and comfort customizing and extending it as needed.
3.Proficiency in Git and collaborative development workflows.
4.Strong understanding of RESTful API design and implementation.
5.Excellent problem-solving skills, attention to detail, and a critical, analytical mindset.
6.Strong communication skills and a collaborative team spirit.
